**Nearest Neighbor Search:: A Database Perspective (Series in Computer Science)** Apostolos N. Papadopoulos

Modern applications are both data and computationally intensive and require the storage and manipulation of voluminous traditional (alphanumeric) and nontraditional data sets (images, text, geometric objects, time-series). Examples of such emerging application domains are: Geographical Information Systems (GIS), Multimedia Information Systems, CAD/CAM, Time-Series Analysis, Medical Information Sstems, On-Line Analytical Processing (OLAP), and Data Mining. These applications pose diverse requirements with respect to the information and the operations that need to be supported. From the database perspective, new techniques and tools therefore need to be developed towards increased processing efficiency.

This monograph explores the way spatial database management systems aim at supporting queries that involve the space characteristics of the underlying data, and discusses query processing techniques for nearest neighbor queries. It provides both basic concepts and state-of-the-art results in spatial databases and parallel processing research, and studies numerous applications of nearest neighbor queries.

### **From reader reviews:**

#### **Ruben Martin:**

The book Nearest Neighbor Search:: A Database Perspective (Series in Computer Science) can give more knowledge and also the precise product information about everything you want. So why must we leave the best thing like a book Nearest Neighbor Search:: A Database Perspective (Series in Computer Science)? A number of you have a different opinion about reserve. But one aim which book can give many information for us. It is absolutely right. Right now, try to closer using your book. Knowledge or information that you take for that, you may give for each other; you could share all of these. Book Nearest Neighbor Search:: A Database Perspective (Series in Computer Science) has simple shape however, you know: it has great and massive function for you. You can look the enormous world by available and read a publication. So it is very wonderful.

#### **Sandra Byrom:**

Information is provisions for people to get better life, information presently can get by anyone in everywhere. The information can be a information or any news even a concern. What people must be consider when those information which is inside the former life are difficult to be find than now is taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you find the unstable resource then you have it as your main information it will have huge disadvantage for you. All those possibilities will not happen with you if you take Nearest Neighbor Search:: A Database Perspective (Series in Computer Science) as your daily resource information.

#### **Cedric Barnett:**

Beside that Nearest Neighbor Search:: A Database Perspective (Series in Computer Science) in your phone, it could give you a way to get nearer to the new knowledge or details. The information and the knowledge you will got here is fresh through the oven so don't possibly be worry if you feel like an aged people live in narrow town. It is good thing to have Nearest Neighbor Search:: A Database Perspective (Series in Computer Science) because this book offers to your account readable information. Do you oftentimes have book but you rarely get what it's all about. Oh come on, that won't happen if you have this in your hand. The Enjoyable agreement here cannot be questionable, like treasuring beautiful island. Techniques you still want to miss this? Find this book as well as read it from currently!

#### **James Labrecque:**

This Nearest Neighbor Search:: A Database Perspective (Series in Computer Science) is brand new way for you who has intense curiosity to look for some information because it relief your hunger details. Getting deeper you on it getting knowledge more you know or perhaps you who still having little bit of digest in reading this Nearest Neighbor Search:: A Database Perspective (Series in Computer Science) can be the light food for you personally because the information inside this specific book is easy to get by means of anyone.

These books develop itself in the form which can be reachable by anyone, yeah I mean in the e-book application form. People who think that in book form make them feel drowsy even dizzy this book is the answer. So there is no in reading a e-book especially this one. You can find actually looking for. It should be here for you. So , don't miss this! Just read this e-book type for your better life along with knowledge.
