Operations Research: An Introduction (10th Edition) Hamdy A. Taha

For junior/senior undergraduate and first-year graduate courses in Operations Research in departments of Industrial Engineering, Business Administration, Statistics, Computer Science, and Mathematics.

Operations Research provides a broad focus on algorithmic and practical implementation of Operations Research (OR) techniques, using theory, applications, and computations to teach students OR basics. The book can be used conveniently in a survey course that encompasses all the major tools of operations research, or in two separate courses on deterministic and probabilistic decision-making.

With the **Tenth Edition**, the author preserves classical algorithms by providing essential hand computational algorithms as an important part of OR history. Based on input and submissions from OR students, professors, and practitioners, the author also includes scenarios that show how classical algorithms can be beneficial in practice. These entries are included as *Aha! Moments* with each dealing with stories, anecdotes, and issues in OR theory, applications, computations, and teaching methodology that can advance the understanding of fundamental OR concepts.

The Companion Website for **Operations Research, 10/e** (www.pearsonhighered.com/taha) provides valuable resources for both students and instructors. Resources include case studies that require students to employ OR tools from multiple chapters, **Excel**, **TORA**, and **AMPL** files as well as additional chapters and appendixes. A note about accessing the Companion Website:

- Instructors should click the “Register” link and follow the on-screen directions to access the site. Instructors need a Pearson Education account to register, but do not require an additional Access Code.
- Students can access the Companion Website by redeeming the Access Code included in the front of their new copy of **Operations Research, 10/e**. Students can also purchase Companion Website access online.

The Instructor Resource Center contains the Solutions Manual and PowerPoints of the art from the book. Instructors can download these resources from www.pearsonhighered.com/irc
