Patient Safety in the Intensive Care Unit

Joint Commission

Patient Safety in the Intensive Care Unit Joint Commission

Millions of seriously ill patients are admitted annually to intensive care units (ICUs) around the world. When it comes to patient safety problems in the ICU, the similarities and differences in medical issues faced by critically ill surgical or medical ICU patients are important. Continued reassessment and reevaluation of evidence-based protocols are required so that ICU practices may be modified when new strategies of care have been demonstrated as effective and efficient. Patient Safety in the Intensive Care Unit explores how The Joint Commission's requirements guide the provider and organizational efforts in one of a hospital's most crucial departments--the ICU.
