**Mobilities and Inequality (Transport and Society)** Hanja Maksim, Manfred Max Bergman

This book opens up the debate on the interrelations between space and mobilities with regard to different dimensions of social inequality. Based on the premise that the dynamics caused by modernization, globalization, migration and social change affect the structuring of the social fabric, the focus of the book is to illuminate these processes of social and spatial re-structurings. A leading team of contributors from the Cosmobilities network highlight different aspects of inequality in relation to mobilities, such as gender, supplying transport infrastructure, job-related relocations, multi-locality, social network geography, and socio-spatial development.
