**Small-Scale Map Projection Design (Research Monographs in Geographic Information Systems)** Frank CanTERS

The use of computers in cartography has made it a lot easier for map makers to transform data from one map projection to another and experiment with alternative representations of geographical data. Yet this has also created new challenges and opportunities for map projection scientists. Small Scale Map Projection Design focuses on numerical map projection research, and is written from the perspective of the map projection user. It demonstrates how advances in the measurement of map projection distortion and in the development of low error map projections can help map makers decide what type of map projection is best for their purpose, and shows how they can eventually design their own tailor-made map projections.

A number of significant contributions have been made to the subject over recent decades, and these are reviewed along with a substantial amount of original, unpublished material. This theoretical material is tied to practical applications and issues such as map projection use, optimization and selection, which are far too often carried out with simple rules-of-thumb methods.

### **From reader reviews:**

#### **Orlando Hernandez:**

What do you regarding book? It is not important to you? Or just adding material if you want something to explain what your own problem? How about your extra time? Or are you busy person? If you don't have spare time to try and do others business, it is make one feel bored faster. And you have spare time? What did you do? Every person has many questions above. They have to answer that question due to the fact just their can do this. It said that about reserve. Book is familiar on every person. Yes, it is correct. Because start from on kindergarten until university need this Small-Scale Map Projection Design (Research Monographs in Geographic Information Systems) to read.

#### **Donald Cortes:**

This Small-Scale Map Projection Design (Research Monographs in Geographic Information Systems) book is simply not ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is definitely information inside this book incredible fresh, you will get info which is getting deeper you actually read a lot of information you will get. This particular Small-Scale Map Projection Design (Research Monographs in Geographic Information Systems) without we comprehend teach the one who reading through it become critical in imagining and analyzing. Don't possibly be worry Small-Scale Map Projection Design (Research Monographs in Geographic Information Systems) can bring if you are and not make your carrier space or bookshelves' turn out to be full because you can have it within your lovely laptop even telephone. This Small-Scale Map Projection Design (Research Monographs in Geographic Information Systems) having very good arrangement in word in addition to layout, so you will not sense uninterested in reading.

#### **Anthony Tipton:**

Are you kind of hectic person, only have 10 or perhaps 15 minute in your morning to upgrading your mind skill or thinking skill perhaps analytical thinking? Then you have problem with the book than can satisfy your limited time to read it because pretty much everything time you only find reserve that need more time to be learn. Small-Scale Map Projection Design (Research Monographs in Geographic Information Systems) can be your answer since it can be read by you who have those short time problems.

#### **Marina Tucker:**

You could spend your free time to see this book this guide. This Small-Scale Map Projection Design (Research Monographs in Geographic Information Systems) is simple bringing you can read it in the playground, in the beach, train along with soon. If you did not include much space to bring the particular printed book, you can buy typically the e-book. It is make you quicker to read it. You can save the book in your smart phone. And so there are a lot of benefits that you will get when one buys this book.
