Mastering JSP

Todd Cook

Mastering JSP Todd Cook
JSP, or JavaServer Pages, is Sun's technology for delivering interactive Web applications with Java (it allows a programmer to embed Java code in an HTML page). It competes with Microsoft's ASP technology, as well as Perl/CGI and JavaScript. This book covers JSP 1.2 and new features expected to be introduced in JSP 1.3, for J2EE (Java 2 Enterprise Edition) 1.4. Using JSP to create websites is one of the fastest-growing areas of the programming market. Because programming JSP pages does not require extensive knowledge of the Java language itself, the technology can be used by web designers as well as developers.
