Dose Finding by the Continual Reassessment Method (Chapman & Hall/CRC Biostatistics Series)

Ying Kuen Cheung

As clinicians begin to realize the important role of dose-finding in the drug development process, there is an increasing openness to "novel" methods proposed in the past two decades. In particular, the Continual Reassessment Method (CRM) and its variations have drawn much attention in the medical community, though it has yet to become a commonplace tool. To overcome the status quo in phase I clinical trials, statisticians must be able to design trials using the CRM in a timely and reproducible manner.

A self-contained theoretical framework of the CRM for researchers and graduate students who set out to learn and do research in the CRM and dose-finding methods in general, **Dose Finding by the Continual Reassessment Method** features:

- Real clinical trial examples that illustrate the methods and techniques throughout the book
- Detailed calibration techniques that enable biostatisticians to design a CRM in timely manner
- Limitations of the CRM are outlined to aid in correct use of method

This book supplies practical, efficient dose-finding methods based on cutting edge statistical research. More than just a cookbook, it provides full, unified coverage of the CRM in addition to step-by-step guidelines to automation and parameterization of the methods used on a regular basis. A detailed exposition of the calibration of the CRM for applied statisticians working with dose-finding in phase I trials, the book focuses on the R package 'dferm' for the CRM and its major variants.

The author recognizes clinicians' skepticism of model-based designs, and addresses their concerns that the time, professional, and computational resources necessary for accurate model-based designs can be major bottlenecks to the widespread use of appropriate dose-finding methods in phase I practice. The theoretically- and empirically-based methods in **Dose Finding by the Continual Reassessment Method** will lessen the statistician's burden and encourage the continuing development and implementation of model-based dose-finding methods.

From reader reviews:

Shawn Croll:

Book is usually written, printed, or outlined for everything. You can know everything you want by a publication. Book has a different type. As you may know that book is important point to bring us around the world. Next to that you can your reading expertise was fluently. A book Dose Finding by the Continual Reassessment Method (Chapman & Hall/CRC Biostatistics Series) will make you to end up being smarter. You can feel far more confidence if you can know about every little thing. But some of you think in which open or reading the book make you bored. It is not necessarily make you fun. Why they may be thought like that? Have you looking for best book or acceptable book with you?

Linda Livingston:

Book is to be different for each grade. Book for children until finally adult are different content. As we know that book is very important for people. The book Dose Finding by the Continual Reassessment Method (Chapman & Hall/CRC Biostatistics Series) ended up being making you to know about other information and of course you can take more information. It is quite advantages for you. The publication Dose Finding by the Continual Reassessment Method (Chapman & Hall/CRC Biostatistics Series) is not only giving you more new information but also to become your friend when you truly feel bored. You can spend your current spend time to read your reserve. Try to make relationship together with the book Dose Finding by the Continual Reassessment Method (Chapman & Hall/CRC Biostatistics Series). You never sense lose out for everything if you read some books.

Michael Grammer:

The actual book Dose Finding by the Continual Reassessment Method (Chapman & Hall/CRC Biostatistics Series) has a lot info on it. So when you check out this book you can get a lot of benefit. The book was published by the very famous author. Mcdougal makes some research just before write this book. This kind of book very easy to read you can obtain the point easily after looking over this book.

Anthony Martin:

Precisely why? Because this Dose Finding by the Continual Reassessment Method (Chapman & Hall/CRC Biostatistics Series) is an unordinary book that the inside of the book waiting for you to snap this but latter it will shock you with the secret that inside. Reading this book next to it was fantastic author who have write the book in such wonderful way makes the content inside easier to understand, entertaining way but still convey the meaning fully. So , it is good for you for not hesitating having this anymore or you going to regret it. This amazing book will give you a lot of rewards than the other book have such as help improving your talent and your critical thinking way. So , still want to hold off having that book? If I were you I will go to the publication store hurriedly.
