Current Research in Medicinal Plants

Current Research in Medicinal Plants

Medicinal plants are used traditionally for preparing herbal medicines and remedies. They are also used in manufacturing and developing contemporary medicines. This book attempts to compile the current researches and experiments in the field of medicinal plants that focus on identifying new species of herbal plants, analysing their characteristics and properties, and examine their emerging applications. Some of the important topics elucidated herein are plant nutrition and physiology, phytochemical properties, pharmacognosy, etc. Researchers and students engaged in this field will find this book helpful.
